The following come from our selection of comments. These two comments are used when not enough data is available or if the data does not span the month:

1) *Ustman received less than 15 days of inventory records. Ensure data*

is collected every day site is in operation. If available, submit

complete inventory records for re-evaluation.

2) *Data does not span entire month. USTMAN requires 15 days spanning*

entire month to issue a valid status call. If available, submit

complete inventory records for re-evaluation.

Call if you have questions 800-253-8054.

Lakewood, CO 80226

Note: Per conversation with Randy Nelson, they would like a full month, but can deal with 15 day. A lot of people skip a few days per month. It's alright, as long as data is good.
